**Bulletin (New Series) of the American Mathematical Society**

This journal is devoted to articles of the following types:

**Research-Expository Surveys**

These are, by definition, papers that present a clear and insightful exposition of significant aspects of contemporary mathematical research. Gibbs lectures, Progress in Mathematics lectures, and retiring presidential addresses will be included in this section.

**Research Reports**

These are brief, timely reports on important mathematical developments. They are normally solicited and often written by a disinterested expert.

**Book Reviews**

Book Reviews are accepted for publication by invitation only. Unsolicited manuscripts will not be considered.
